

School Report

Report #69 - generated 2026-07-18T00:46:55.213141508

Executive summary

Events	Interactions	Schools	Registrations
34	33	90	1030

Executive brief: aggregated charts, key findings, and dataset coverage. Raw records stay in VNMap. The selected filters matched 4989 records across 3 data sections.

Key findings

- 1. School activity: Highest value: THPT Ba Vi (2).
- 2. Events by type: Highest value: SURVEY (11).
- 3. Interaction trend: Highest value: 2026-07-02 (33).
- 4. Interaction outcomes: Highest value: SUCCESS (30).

Report design

The main PDF is intentionally concise for review and decision-making. Use VNMap filters or a dedicated data export when row-level investigation is required.

Performance overview

FIGURE 1

School activity

Interactions recorded for each selected school.
Unit: count | Period: All available dates to today | Source: School summary

Insight: Highest value: THPT Ba Vì (2).

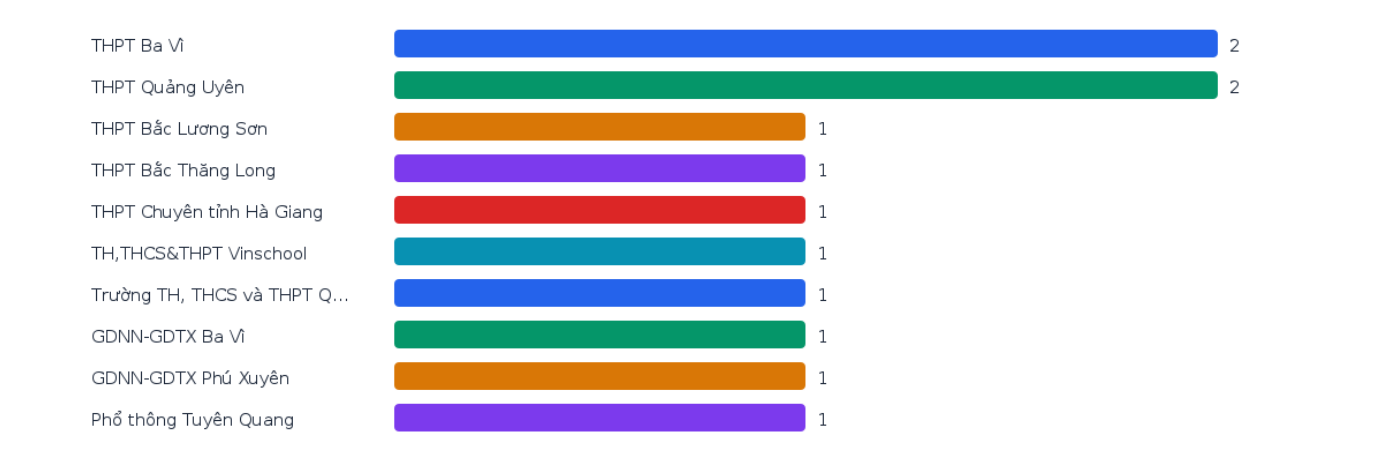

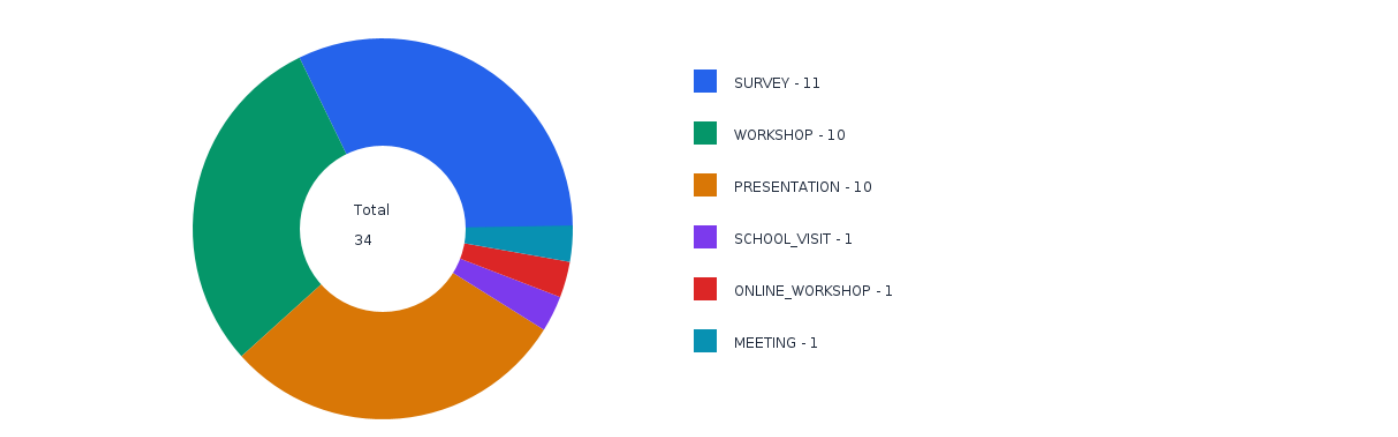

FIGURE 2

Events by type

Selected school events grouped by event type.
Unit: count | Period: All available dates to today | Source: Event records

Insight: Highest value: SURVEY (11).

Performance overview

FIGURE 3

Interaction trend

Daily interaction volume in the selected reporting period.
Unit: count | Period: All available dates to today | Source: Interaction records

Insight: Highest value: 2026-07-02 (33).

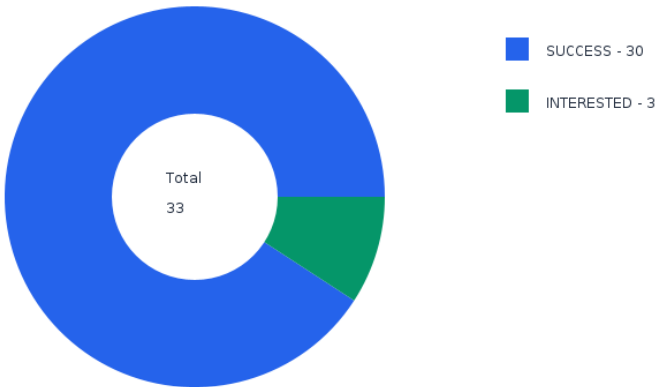

FIGURE 4

Interaction outcomes

Selected school interactions grouped by outcome.
Unit: count | Period: All available dates to today | Source: Interaction analytics

Insight: Highest value: SUCCESS (30).

Data coverage

Counts reflect all records matching the selected filters. The executive PDF keeps detail data in the system to avoid duplicating long operational tables.

Data section	Matched	PDF treatment
Summary	4922	Aggregated into KPIs, findings, or charts
Events	34	Aggregated into KPIs, findings, or charts
Interactions	33	Aggregated into KPIs, findings, or charts

Need every row? Apply narrower filters in VNMap or use a dedicated CSV/data export. A decision report should not duplicate the operational database.
