

Campaign Report

Report #67 - generated 2026-07-18T00:46:53.331881797

Executive summary

Events	Interactions	Schools	Registrations
34	33	90	1030

Executive brief: aggregated charts, key findings, and dataset coverage. Raw records stay in VNMap. The selected filters matched 1271 records across 7 data sections.

Key findings

- 1. Campaign status distribution: Highest value: ACTIVE (5).
- 2. Events per campaign: Highest value: 1 (5).
- 3. Interaction trend: Highest value: 2026-07-02 (33).
- 4. Participating schools by province: Highest value: Hà Nội (23).

Report design

The main PDF is intentionally concise for review and decision-making. Use VNMap filters or a dedicated data export when row-level investigation is required.

Performance overview

FIGURE 1

Campaign status distribution

Distribution of selected campaigns by current status.
Unit: count | Period: All available dates to today | Source: Campaign summary

Insight: Highest value: ACTIVE (5).

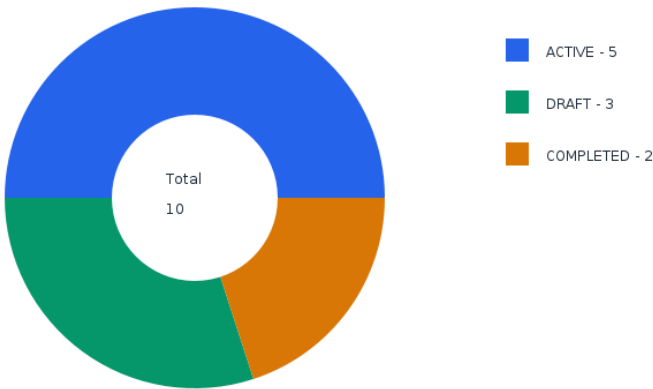

FIGURE 2

Events per campaign

Number of selected events grouped by campaign.
Unit: count | Period: All available dates to today | Source: Event records

Insight: Highest value: 1 (5).

Performance overview

FIGURE 3

Interaction trend

Daily interaction volume in the selected reporting period.
Unit: count | Period: All available dates to today | Source: Interaction records

Insight: Highest value: 2026-07-02 (33).

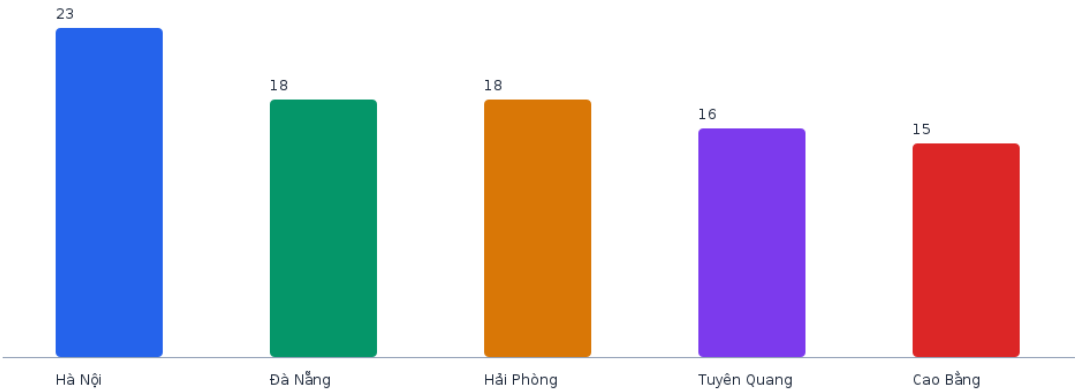

FIGURE 4

Participating schools by province

Distinct selected schools grouped by province.
Unit: count | Period: All available dates to today | Source: School records

Insight: Highest value: Hà Nội (23).

Data coverage

Counts reflect all records matching the selected filters. The executive PDF keeps detail data in the system to avoid duplicating long operational tables.

Data section	Matched	PDF treatment
Summary	10	Aggregated into KPIs, findings, or charts
Events	34	Aggregated into KPIs, findings, or charts
Schools	90	Aggregated into KPIs, findings, or charts
Assignments	72	Aggregated into KPIs, findings, or charts
Registrations	1030	Aggregated into KPIs, findings, or charts
Interactions	33	Aggregated into KPIs, findings, or charts
Analytics	2	Aggregated into KPIs, findings, or charts

Need every row? Apply narrower filters in VNMap or use a dedicated CSV/data export. A decision report should not duplicate the operational database.
